

Content	Visuals	Mechanics	Overall	average_score	Did Well	Needs Work
7	6	7	7	6.75	Your explanation of the background was great! Very clear what you were investigating. The facets of Folia were very nice.	The bar graphs were good, but I feel like they could be spiced up. I would've liked to see significance values.
7	6	7	7	6.75	The data was clearly presented and the speaker clearly communicated.	The speaker could speak towards the audience.
6	5	7	6	6	Data was well explained and thorough	I would have liked to see multiple types of plots
7	7	7	7	7	Showed great confidence throughout the presentation, great job!!	N/A
6	7	7	7	6.75	Liked how data was visualized in multiple ways	Could have gone into more detail on the different cilia
7	7	7	7	7	I liked how easy your data was to interpret.	Could focus on addressing the audience a little more.
6	5	7	7	6.25	The questions were very clear and the analysis told a cohesive story throughout. I really liked the acknowledgments!	Could be cool to test those differences with a quick t-test to see what's happening.
7	7	7	7	7	The data was easy to see and the story was easy to follow.	Some of the code wasn't really important to add to the presentation but made sense.
7	7	7	7	7	Good explanation of background of your work and how you approached the data set. I appreciated that you took a second to explain the meaning of the plots/what to take away from them, and then used that as rationale for your next approach to analyzing the data, great speaking/presentation skills, I liked your choice of color in the plots. Loled at your mom thinking you're a hacker now hahaha.	Say "um" a little less, the good thing was that you did a good job of not saying it while speaking on the data, but you tended to say it as a transition when moving from one discussion to another
7	7	7	7	7	really beautiful, clean graphs. very clear!	get future work description
7	5	6	6	6	Using her own data and seeing how she thought about plotting it in different ways. Acknowledgements were also great :)	Utilizing different plotting methods.
5	5	6	6	5.5	Pacing was fantastic and overall organization of the presentation was great. Handling of questions was great to.	A little bit too much background into cilia. It was a bit hard to keep up.
