

Content	Visuals	Mechanics	Overall	average_score	Did Well	Needs Work
7	7	7	7	7	The individual was extremely confident and spoke very thoroughly of their presentation	N/A
7	6	7	7	6.75	Loved your quick and clear background. I also liked how you clearly outlined each step in your analysis thought process.	I would take out unnecessary "busy" plots.
7	7	6	7	6.75	Flow of the presentation was great.	Changing the theme of the plots to something clearer (without background) would maybe help with visualizing the data clearer.
7	7	7	7	7	Really thorough- great visualization of graphs (really impressive)!!	I love u Jeremy but it was a lot of information that is probably really relevant to you but I think I got lost a little bit without a ton of background of the material. I appreciate the fit tho.
6	5	5	6	5.5	I liked that you actually calculated measurements off of raw data. Your presentation style is very clear and easy to understand.	A lot of your plots were very simplistic. Instead of just a single dot showing the mean, I would have liked a plot that illustrated the actual raw data points.
7	7	7	7	7	Great background information and clarity of presentation	nothing! i thought the presentation was perfect
6	5	6	6	5.75	The data was thoroughly analyzed.	The presentation could be cut down to fit into the timeframe and avoid rushing through some of the things that help the data make sense. Also adding StD Dev would be nice instead of presenting the data as a single data point.
7	6	7	6	6.5	Presentation was very thorough and well explained with good visuals	Presentation went a bit long for the time slot, I think some topics could have been made more concise
6	7	6	7	6.5	Great visuals that were very clear, introduction was very clear	I got confused by the different stainings, so explain that more.
7	7	7	7	7	Spoke very clearly/loudly/concisely, good job of introducing the background and rationale for why you did what you did	I think you rushed a little bit on the parts where you mentioned that the data looked a little busy. Maybe slow down a bit and explain the issue and your take on resolving this issue instead of immediately jumping to the next graph
7	7	6	7	6.75	Great background/introduction.	It would have been nice to see other visualizations of the data to understand it better.
6	5	6	6	5.75	The data was presented well.	The speaker could slow down their speed when talking.
